June 16th, 2011

TO: Hyster Dealer Principals, Branch Managers, Operation Managers, Aftermarket Sales Managers, Parts Managers and Service Managers, Unit Sales Managers

Subject: **Turn@bout® Maneuverability Adaptor**

Hyster Company is pleased to provide an Aftermarket alternative to help pallet jack operators become more proficient in retrieving and handling product ...introducing the Turn@bout Maneuverability Adaptor.

The Turn@bout Maneuverability Adaptor is an economical solution (\$125 C/L pricing) that can increase efficiency, reduce labor costs, and provide a quick return on your investment. By installing the Turn@bout to your pallet jack, the turning radius can be enhanced by as much as 72% (**in the unloaded condition**), allowing operators to maneuver inside semi-trailers and congested loading docks with greater efficiency. To put this into perspective, a pallet jack with 45 inch forks has a turning radius of 8.33 feet. The same pallet jack with the Turn@bout Maneuverability Adaptor installed has a turning radius of 5 feet.

Below are some of the advantages associated with the Turn@bout Maneuverability Adaptor:

- Enhanced Maneuverability – turns within the pallet jacks own length
- Easy Installation (installs in minutes)
- Move more material in less time with less effort
- Quick return on investment
- Increase warehouse space with enhanced pallet utilization

The Turn@bout maneuverability adaptor can improve pallet entry time and is designed to lift up when the forks are raised.

The Turn@bout maneuverability adaptor is a Direct Ship product; by clicking **here** you can view the customer flyer, program procedures and installation instructions. Most major brand of pallet jacks are easily retrofitted with the Turn@bout, and the benefits are seen immediately.

Below are some customers / applications that the Turn@bout Maneuverability Adaptor is ideally suited:

- Trucking Industry
- Warehousing and Distribution
- Cross Docking Facilities
- Retail Food Stores
