

MANEUVERABILITY

WHEN YOU NEED IT!

Grand Steer, Inc.

Improve the tracking and handling of your pallet jack with the new Turn@bout maneuverability adaptor. The Turn@bout maneuverability adaptor is a new and effective device that can significantly reduce the turning radius of pallet jacks.

Enhanced Maneuverability

- Increases turn radius by as much as 72% (*unloaded condition only*)
- Easier to position the pallet jack under pallets
- Easier to maneuver in confined spaces
(like inside a semi-trailer or congested loading dock)

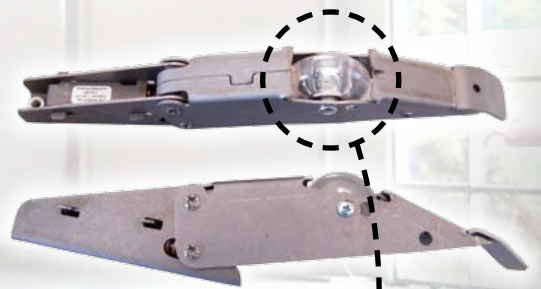

Easy Installation

- Standard Installation Kit comes with template, drill bit and mounting hardware
- Can be installed in minutes using installation guide
- Designed to fit most major brands of pallet jacks

Move more material in less time with less effort

- Increase productivity and throughput
- Quick ROI

The Turn@bout maneuverability adaptor not only works to get the pallet jack positioned underneath the pallet, but is designed to lift up with the forks so it doesn't reduce stability when handling heavy loads.

U.S. Patent Nos.
7,226,060; 7,427,075; 7,475,887 and Patent Pending

Why wait, get your Turn@bout maneuverability adaptor (P/N 4037405) today and see just how easy it is to go from turning around, to being able to Turn@bout!
