Up-sell Your Customer to a Fork Positioner

Bolzoni Auramo's fork positioners allow operators to move the forks fast and accurately to fit different pallet sizes without leaving the driver's seat. The operator won't need to manually adjust the forks as they do today when using a sideshift attachment. The benefits of a fork positioner include:

Increased Productivity – Operator won't need to manually adjust the forks for various size loads, increasing response time and improving productivity.

Reduce Pallet Damage – Operators can quickly adjust the forks' width to accommodate various pallet sizes.

Improved Operator Efficiency – Operators can adjust forks with the touch of a button, reducing unnecessary strain while remaining seated on the forklift.

Fork positioners will pay for themselves with the benefits listed above, see [attached link](#) for the Return on Investment calculator to use with your customer.

All of Bolzoni Auramo attachments come with the Platinum Service Guarantee, the attachments will meet or exceed your expectations and Bolzoni Auramo will guarantee it. If for any reason you are not 100% satisfied with BA's attachment or service & if they cannot successfully resolve the issue, Bolzoni Auramo will take the attachment back within 30 days for a full refund. Click on the link for the [Platinum Service Guarantee](#) certificate.
