Model / Series Impact: H50CT (A274)

To: Hyster Dealer Principals, Sales Managers and Sales Representatives
From: J.B. Mayes, Manager, Product Strategy – I.C.E. Products

Subject: CT Diesel Powertrain Launch

Hyster Company is pleased to announce an additional powertrain solution for the H50CT model. The rugged, dependable Yanmar 2.6L diesel engine will be available for order on Monday, May 9th, with first shipments occurring in August.

The Yanmar diesel engine option will allow you to support customers needing a basic, simple truck for their operations using diesel fuel as the primary fuel source. Typical applications might include agricultural, construction, retail lumber or home centers, landscapers and other industries where diesel fuel is used for other on site equipment and/or delivery trucks.

The Yanmar 2.6 L is currently offered on all Fortis pneumatic tire models up through 6000 lbs. When installed in the H50CT, power and efficiency go hand in hand.

All Yanmar engines are field proven with excellent durability and reliability. A simple electro-mechanical throttle control with indirect fuel injection with variable timing based on coolant temperature provides increased torque with reduced engine noise. An efficient composite cooling fan and a robust radiator, isolated from shock and vibration keeps the truck running cool all day.

A high air intake system extends filter life in dusty environments and includes a mechanical filter restriction indicator. Yanmar engines feature 500 hour service intervals and a quick-start glow plug system designed to get customers running in cold temperatures.

As with all of our Yanmar engines, the 2.6L is fully EPA compliant and has met Tier 4 Interim emissions level requirements since 2008.

For additional information on the S/H50CT models including the new diesel engine for the H50CT, enter the Hyster Digital Dealer under the "Training" heading and click on "Sales Support Materials" to see the available tools for the S/H50CT model.

Price pages and options for the new powertrains will be made available on Monday the 9th of May.
