

"With the ever increasing emissions regulations of off highway equipment, technicians must be able to troubleshoot and diagnose these systems properly. They must also be aware of the possible consequences of a misdiagnosis or improper maintenance."

- Brett Horyna
Systems Material Handling

SPECTRUM FUEL MANAGEMENT

Who should attend?

Anyone that works on a truck with the Impco Tier II or III Spectrum Fuel System.

Spectrum Training

Spectrum training is a 2 day seminar designed to give you in-depth knowledge of the spectrum engine. With hands on training you will learn spectrum system components and functions and how to operate the diagnostics kit. The diagnostics kit will be offered to those who attend the class at a discounted price.

Sessions

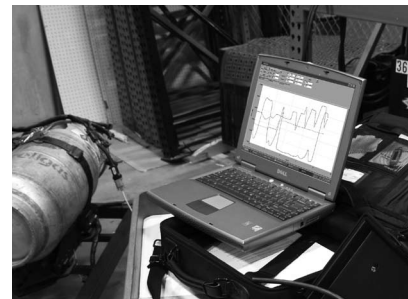

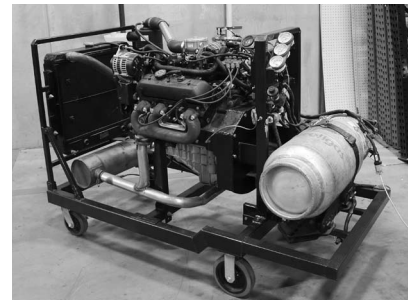

Explanation of the new legislation and regulations governing the engine emissions as adopted by the Environmental Protection Agency (EPA) and the California Air Resources Board (CARB).

The seminar will include in-depth information and hands on training

on system components, operation and tools. Attendees will be shown the diagnostics and display screens and plug into a live running spectrum engine as part of a hands on session. We will use live display screens to activate and clear fault codes.

*Attendees must have access to a laptop with one of the following operating systems; windows vista, windows xp, or windows 2000. Operating systems must have a minimum processor speed of Pentium II 450 MHz or Pentium III 1.0 GHz. Minimum RAM requirement; windows vista 512 MB, windows xp 256MB, Windows 2000 128 MB. A minimum of one available RS232 serial or USB port. ECOM cable supports USB port only.

Receive a 10% discount on the IMPITK-4 diagnostic toolkit when you attend a Spectrum Seminar.
