TO: ALL HYSTER DEALER PRINCIPALS, SALES MANAGERS, & SALES REPRESENTATIVES
FROM: PETER SIESSEL – VICE PRESIDENT, HYSTER MARKETING
SUBJ: Sideshift Lockout Kit

On occasion a customer will need to install a hydraulic attachment on a truck that is equipped with an integral sideshift carriage. This is a common occurrence on dealer rental trucks.

In many instances the sideshift function is not required, and has been eliminated by removing the hydraulic supply hoses from the sideshift cylinder and installing plugs in the ports on the cylinder. Unfortunately, it is possible for the sideshift frame to move off center due to oil transferring from one side of the cylinder to the other.

As a result of Hyster Company's constant product improvement process a new sideshift lockout kit is now available for the integral sideshifts used on 2,500 to 6,500 pound capacity trucks. This installation of the kit will eliminate the possibility of unintended movement of the sideshift frame. Solid Link Kit – Hyster part number 1558766 - may be purchased from the Parts Distribution Center in Danville, IL. This kit replaces the side shift cylinder with a solid link to prevent the outer frame from shifting off center.

Note: This kit **will not** work with the integral side shifter used in the 7,000 through 12,000 products. A new bulletin will be issued when a kit for those models becomes available.

As always, we appreciate the support of our distribution network and the sales organization.

Sincere Regards,

Peter M. Siessel
Vice President of Marketing – Hyster Company
